DEPARTMENT OF UROLOGY

Alexianer St. Hedwig Hospital

This flyer highlights the broad spectrum of the Department of Urology in the Alexianer St Hedwig Hospital.

Our department focuses on the surgical and pharmacological treatment of urological cancers, lithiasis therapy, the treatment of benign prostate enlargements, and urinary incontinence. The Vinic® surgical system allows us to perform robot-assisted surgeries.

OUR SPECTRUM OF UROLOGICAL SERVICES

KIDNEY

- |||| Partial kidney resection
- |||| Nephrectomy
- |||| Microwave ablation of renal tumours
- |||| Target and immunotherapy

PROSTATE

- |||| Nerve-conserving prostatectomy
- |||| Perineal MRI ultrasonic fusion biopsy of the prostate
- |||| Holmium laser enucleation of the prostate (HoLEP)
- |||| Rezum™ (water vapour therapy)
- |||| Prostate TUR
